

I am writing in opposition to HB5262 and SB184. I am a constituent who is concerned about voter integrity and I strongly feel that passing these proposed bills will only further voter apprehension. Removing language in this bill to include all illnesses, not only a personal illness, handicap or otherwise personal hardship preventing in person voting appears to be a blatant way to allow for fraud to occur.

Also I don't believe that requiring a photo ID is at ALL a deterrent to voting. You need a photo ID for many activities such as driving a car, entering your child's school, at the airport, to purchase spray paint, cough medicine, alcohol and many other things that aren't nearly as important as voting. And if you were on board with vaccine passports you have zero argument that voter ID is a deterrent.

I ask that you vote NO on HB5262 and SB184. And please remember that the way you vote affects the way I will vote in November.

Thank you

Tyler Young
